

Table of contents

Preface
Acknowledgements
Flow chart

	Nanomaterials	Page volume
[1]	Nanoporous dielectric materials for advanced micro- and nanoelectronics <i>M. Baklanov</i>	17
[2]	Sciences in micro- and nanoelectronics processes using an environmentally-friendly medium <i>E. Kondoh, M. Watanabe, Y. Takeuchi, T. Ueno, M. Matsubara</i>	5
[3]	Ion-beam induced formation of nanoparticles with predicted structure <i>L. Kutsenko, L. Burlaka, A. Kiv, M. Talianker, D. Fuks</i>	12
[4]	Potential of carbon nanotubes for cancer cells thermolysis in an RF exposing field <i>M. Shuba, S. Maksimenko, G. Slepyan, G.W. Hanson</i>	12
[5]	Strain fields and electronic structure of vacancy-type defects in graphene from first-principles simulation <i>A. Krasheninnikov</i>	11
[6]	Structural channels as natural tracks in crystals <i>D. Fuks, A. Kiv, D. Fink</i>	14
[7]	Symmetry and non-empirical calculations of structure and properties of single- and double-wall SrTiO₃ nanotubes <i>R. Evarestov, A. Bandura</i>	11
[8]	Cylindrical wave method for pure and doped nanotubes <i>P. D'yachkov</i>	15
[9]	CNT arrays grown upon catalytic nickel particles as applied in the nanoelectronic devices: <i>ab initio</i> simulation of growth mechanism <i>Yu. F. Zhukovskii, E.A. Kotomin, S. piskunov, S. Bellucci</i>	14
[10]	Electrical properties and electromagnetic shielding effectiveness of carbon based epoxy nanocomposites <i>S. Bellucci, F. Micciulla, I. Sacco, L. Coderoni, G. Rinaldi</i>	10
[11]	<i>Ab initio</i> calculations of SrTiO₃ (111) surfaces <i>R. Egglis</i>	7
[12]	Nanocomposites for novel sensing systems <i>A. Sternberg, I. Muzikante, R. Dobulans, D. Millers, L. Grigorjeva, K. Smits, M. Knite, G. Sakale</i>	10
[13]	Quasi-one-dimensional silicon clusters as elements of novel nanowires <i>F. Umarova, P. Tereshchuk, A. Normurodov</i>	6
[14]	Interaction between oxygen and yttrium impurity atoms as well as vacancies in fcc iron lattice: <i>ab initio</i> modeling <i>A. Gopejenko, Yu. Zhukovskii, P. Vladimirov, E. Kotomin, A. Moslang</i>	10
[15]	Wear resistant nanostructured multi-component coatings <i>M. Urbana, A. Urbahs, K. Savkova, S. Bogdanova</i>	10
[16]	Nanocomposite materials – ferroelectric nanoparticles	11

incorporated into porous matrix		
<i>E.Rysiakiewicz-Pasek,R. Poprawski, A. Cižman, A. Sieradzki</i>		
[17]	Mechanism of intermolecular electron transfer in bionanostructures	7
<i>A. Gruodis, N. Galikova, K. Šarka, R. Aulé, D. Batiuškaité, G. Aulis</i>		
[18]	Cluster Embedding Method with non-orthogonal wave functions for Simulation of Nanodevices	12
<i>E.K. Shidlovskaya</i>		
Nanodevices		
[19]	Smart Sensor Systems	10
<i>G. Hunter, J. R. Stetter, P. J. Hesketh, Ch.-Ch. Liu</i>		
[20]	Foundry Technologies Focused on Environmental and Ecological Applications	9
<i>Ya. Roizin, M. Lisiansky, E. Pikhay</i>		
[21]	Electronic nose in deeply scaled nanodevices	11
<i>C. Pace</i>		
[22]	Simulation of fundamental properties of CNT- and GNR-Metal interconnects for development of new nanosensor systems	25
<i>Yu. Shunin, Yu.F. Zhukovskii, N.Yu. Burlutskaya, V.I. Gopeyenko, S. Bellucci</i>		
[23]	Surface modification for novel nanosensors creation	6
<i>V. Smatko, I. Donchev, E. Kovacova, V. Strbík, S. Zyrynn</i>		
[24]	Status and perspectives of ion track electronics for advanced biosensing	12
<i>L. Alfanta, Yo. Mandabi, L. Bacakova, J. Dias, D. Fink, A. Kiv, G. Munoz, D. Fuks, R.M. Papaleo, C.T. de Souza, J. Vacík, V. Hnatowicz</i>		
[25]	Ion track based novel nanostructures: A step towards magnetic nanosensors	9
<i>A. Chandra, S. Rawat</i>		
[26]	Diffusion Process in Quasi-one-dimensional structures as elements of novel nanodevices	6
<i>J.-R. Kalnin</i>		
[27]	New adsorption active nanoclusters for ecological monitoring	9
<i>V. Litovchenko, T. Gorbanyuk, V. Solntsev</i>		
[28]	Nanostructured intermetallic-ceramic coatings for the gas turbine engines blade	8
<i>I. Kurjanovich, A. Urbahs, K. Savkovs, M. Urbaha</i>		
[29]	Intrinsic magnetism in tin dioxide	9
<i>V. Golovanov, N. Ozcan, M. Viitala, T. Rantala, J. Vaara</i>		
[30]	Safety monitoring of materials and components of nuclear power plants	13
<i>A. Gokhman, F. Bergner</i>		
[31]	Nanoparticles in gate dielectric of memory transistors	6
<i>O. Britavská, S. Zyrynn, I. Tolkach</i>
